Summary

Full Stack MERN Developer helping businesses and individuals build clean, functional, and responsive web applications. Experienced in end-to-end development — from database design and REST API development to responsive React frontends. Delivered real-world projects including a personal finance tracker, an enterprise role management system, and a movie discovery platform. Available for freelance projects, remote collaborations, and short or long-term contracts.

Services

- **Custom Web Applications** — Full-stack apps built with the MERN stack tailored to your business needs
- **Frontend Development** — Responsive, mobile-friendly UIs using React.js, Tailwind CSS, and DaisyUI
- **Backend & API Development** — Scalable REST APIs using Node.js and Express.js with MongoDB or MySQL
- **UI Design to Code** — Convert Figma or any design into a fully functional web application
- **Bug Fixes & Optimization** — Debug, improve performance, and optimize your existing web app
- **Authentication Systems** — Secure JWT-based login, registration, and role-based access control

Projects

Pockentra

React, Node.js, Express.js, MongoDB, JWT, Tailwind CSS

- Built a full-stack personal finance tracker enabling users to manage income and expenses with monthly overviews.
- Implemented interactive pie charts for category-wise spending visualization and a paginated transaction table with sort and filter options.
- Developed JWT-based authentication, user profile management, and a fully responsive UI with drawer-based transaction details.

Role Based Access System

React, Node.js, Express.js, MySQL, JWT

- Developed a full-stack enterprise management system with granular role-based access control — ideal for admin dashboards and SaaS products.
- Enabled admins to create roles with Read/Create/Update/Delete permissions per module and manage users, enterprises, employees, and products.
- Enforced access control at both UI level (dynamic module rendering) and API level (role-based middleware) for maximum security.

WhatchNow

React, Tailwind CSS, DaisyUI, Trakt API, OMDB API

- Built a responsive movie discovery web app to browse Popular, Trending, and Most Anticipated movies.
- Integrated Trakt API and OMDB API for real-time movie data with fallback poster handling for missing images.
- Implemented search with pagination, Local Storage based watchlist persistence, and active navigation highlighting.

Experience

Frontend Developer Intern

Delighteck, Pune

📅 Dec 2025 – Mar 2026

- Contributed to development and optimization of a production-level fitness mobile application.
- Built and enhanced core features including real-time chat, video conferencing, progress tracking graphs, and payment flows.
- Diagnosed and resolved critical bugs improving app stability, performance, and user experience.
- Integrated REST APIs for dynamic data handling and seamless frontend-backend communication.

Skills

- **Languages:** JavaScript (ES6+)
- **Frontend:** React.js, Tailwind CSS, DaisyUI, Bootstrap
- **Backend:** Node.js, Express.js
- **Database:** MongoDB, MySQL
- **Tools:** Git, Postman, VS Code, Figma
- **Others:** REST APIs, JWT Authentication, RBAC, Responsive Design, Debugging

Certifications

MERN Stack Web Development — Kiran Academy

(2025)

Education

BBA (Computer Application)

HV Desai College, Pune

📅 2020–2023 CGPA: 8.4
